E-Z JACKS

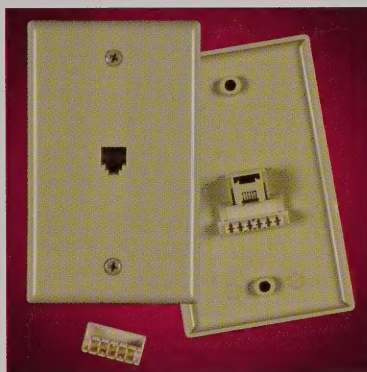

Allen Tel introduces our new line of E-Z Jacks. As time becomes more valuable, the necessity for a quick, efficient installation becomes a major issue. Allen Tel Products has addressed this issue with our new line of E-Z Jack Residential Devices.

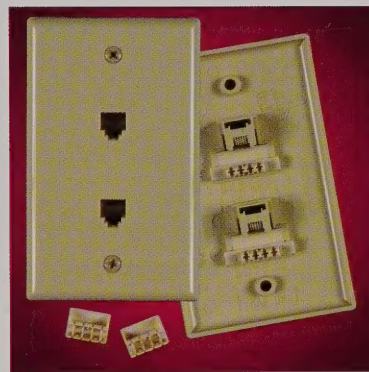

By redesigning the termination point from screw terminals to an IDC Punch Down we are able to save time on installation, while offering a lower price on the Jack. Another unique feature allows you to terminate the jack without removing it from the bag. This allows you to keep the plate clean from painters or other unfriendly elements during construction (see page 2 for more details).

FEATURES

- Time Saving Installation
- Inexpensive
- UL Approved
- No need to strip wire
- Protective Bag

Did You Know?

Allen Tel products are made from the exacting standards that made us famous for quality and craftsmanship.

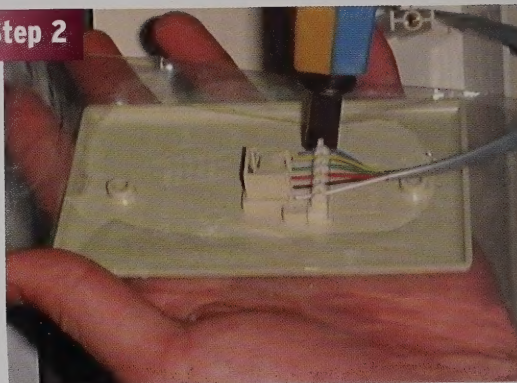

This step-by-step installation shows the new 110-IDC style wall plate. The E-Z Plate style saves time and labor in the termination process. Taking less time than the old style screw terminal wall plate, it also has the added feature of a protective bag that keeps the wall plate from being damaged or becoming dirty during the installation process.

Step 1

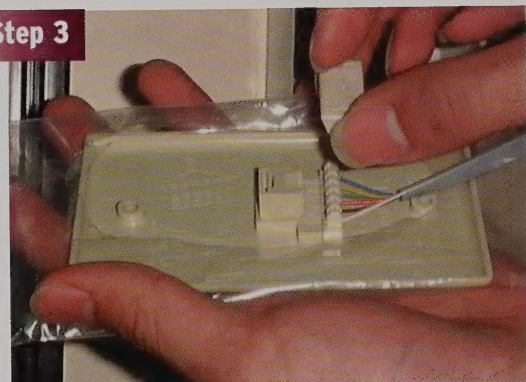

Remove the perforated section of the polybag on the rear of the wall plate.

Step 2

Arrange the wires by color code and punch down onto the 110 terminals. There is no need to separate the wraps or strip the insulation (.25 inches) as required by the old style screw terminals.

Step 3

Install the IDC-110 cover.

Step 4

Align the wall plate to the wall or back box and then tear open the front perforations on the polybag.

Step 5

Install the screws.

Step 6

Tear off the polybag once surrounding construction is complete, and begin to use the wallplate.

VERSATAP MODULAR JACKS

Category 5e Modular Snap-In Jacks (8 Cond. 8 Position)

T55 Series Jacks are designed to accommodate the Versatap Category 5e System. The AT55 Jacks are available in a wide range of colors to meet customer requirements and e/w a color coded label on each jack to accommodate either TIA-568A or TIA-568B wiring. Will accept 22/24 Awg Wire.

Category 3 modular Jack Modules for 22/24 Awg Wire

Meets FCC Part 68, U.L. Listed, EIA/TIA-568 Faceplates and Jack Housings: High impact, self-extinguishing plastic, rated UL94V-0 Modular Jacks. Contacts: Phosphor Bronze Plated with 50 micro-inches of gold over 100 micro-inches of nickel. Connectors: IDC-22/24 Awg insulated wire. Data Rate: Compatible with 10 Mbps IEEE 802.3 (10 Base T) and 16 Mbps token Ring Applications

45° ANGLED FACE PLATES

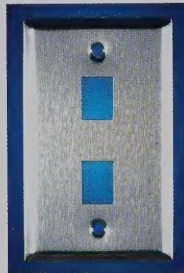

The AT45 series 45° angled Versatap faceplates offers better external protection than the traditional faceplates and helps maintain the proper bend radius that is required for Category 5 and fiber patch cords. The AT45 faceplates will accept the entire family of Versatap snap-in modules and fits over the AT30M or AT45MB surface mounting boxes or fits flush by using the AT90 or AT92 bracket.

STAINLESS STEEL FACEPLATES

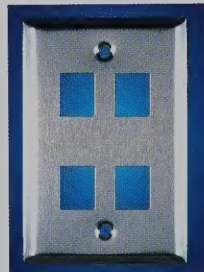

The Stainless Steel Faceplates will not accept AT31 series inserts or AT32F.

VERSATAP PATCHBOXES

CATEGORY 5e 12 PORT PATCH BOX

Allen Tel's new Category 5e 110 Patch Box is designed with the installer in mind, by providing the highest level of application and installation flexibility for fast, affordable solutions. The AT55A/B-12P contains multiple knockouts to accommodate a variety of cable entries, cable ties are furnished to assure undisturbed connections. Easy cover removal allows for fast and easy access for adds, moves and changes. Port and station identification can be accomplished by using the furnished ID Labels under the removable protective window. Mounting options include screws for direct mounting to a backboard or wall. The AT55A/B-12P is equipped with a GB89D Bracket.

The AT55A/B-12P Patch Box is the ideal solution for supporting data installations for small offices or home offices. The Patch Box is manufactured with the consistent quality you have come to expect from Allen Tel Products.

- Adhesive Tape and Mounting Screws are furnished

NETWORK MEDIA BOX

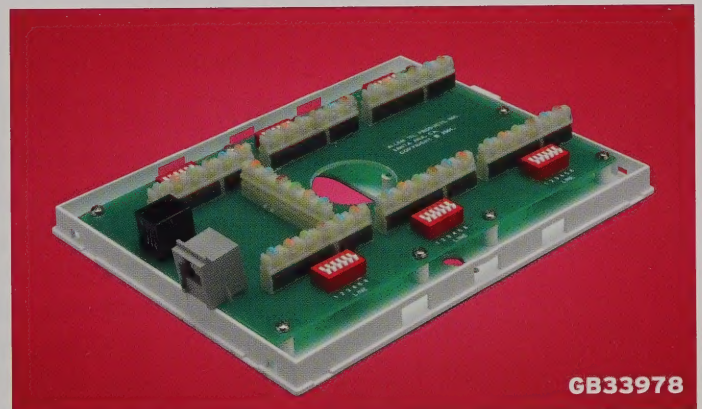

Allen Tel Products announces our GB33645 Network Media Box!

The Media Box is a surface-mounted home run enclosure designed to mount over a standard electrical outlet box, to distribute all residential phone and data lines to various telecom ports throughout the home. The modular design of the GB33645 allows for application - specific installation and an economical solution for future changes. 110-type terminations provide proven performance and reliability.

The GB33645-L1 model is equipped with a Telcom Circuit module providing for up to six lines in and six lines (stations) out. This module also contains an integrated RJ31X alarm intercept used in home security applications. The GB33645-L2 model is equipped with one Telco Circuit module and one Data Circuit module. The Data Circuit module supports a separate Category 5 high-speed digital data line, such as an ISDN or ADSL line. The data service input can be patched to one of four prewired data jacks within your location. The GB33645-L3 model is equipped with two Telco Circuit modules allowing for up to twelve lines in and twelve lines (stations) out.

The **Network Media Box** is the distributing point for the entire Voice & Data installation. Providing a single location for any changes that may occur in the future. Space is provided in the Media Box Model GB33645-L1 for the addition of either one of the following modules for field installation. Model GB33585-K1 is a category 5 four port Data Module for future data requirements. Model GB33585-K3 is a 6 lines in and 6 lines (stations) out Telco Circuit module. This allows for additional Telco service in the future. Model GB33987 is a full size module designed to fit in the GB33645 Network Media Box enclosure. This Module allows flexibility for switching 6 incoming lines (on or off) to 6 individual stations with a 6 position dip switch per station. The Media Network Box also may be ordered with the modules factory installed as listed below.

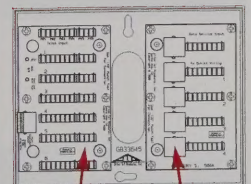

ORDERING INFORMATION

- GB33645-L1 Enclosure equipped with one Telco 6 line circuit module and one RJ31-X security alarm jack.
- GB33645-L2 Enclosure equipped with one Telco 6 line circuit module, one RJ31-X and one 4 port category 5 circuit module.
- GB33645-L3 Enclosure equipped with two Telco 6 line circuit module and one RJ31-X security alarm jack.
- GB33585-K3 Telco 6 line circuit module and one RJ31-X security alarm jack less enclosure.
- GB33585-K1 Data 4 port category 5 circuit module less enclosure.
- GB33978 Telco 6 line 6 station switchable circuit module equipped with one RJ31-X security alarm jack and one RJ-11 (Line 1) test jack

FEATURES

□ Data/Voice Outlet
— Wiring Home Runs

Dimensions: 5.625W x 7.25L x 1.5H

Allen Tel Provides both splitter and inline filters to isolate POTs (Plain Old Telephone service) from the high speed DSL (Digital Subscriber Line) service when they are deployed on the same line. The high quality filters have the stop band attenuation better than 30dB, which helps the user to have a clear and clean communication.

- ANSI T1 In-line filter draft compatible
- FCC part 68 compatible
- UL-listed to US and Canadian
- Stop Band better than 30dB

DSL Splitter Outdoor Device - AT626DSL

DSL (Digital Subscriber Line) provides high-bit rate digital information over telephone subscriber lines. DSL Splitter allows both voice and data signals to travel over the telephone line. This device splits the combined signal to provide separate outputs for both phone and data. DSL Splitter filters out any erratic impedance from telephone equipment, which would interfere with DSL transmissions.

FEATURES

- Environmentally hardened
- Outdoor housing for wall or conduit mounting
- Wiring terminals for NETWORK, VOICE and DATA

FEATURES

- Easy wall phone installation
- Tool-less
- Uninterrupted ADSL service
- Economical installation
- Extra jack for phone accessories

Wall Mount DSL Splitter - AT636DSL

DSL (Digital Subscriber Line) provides high-bit rate digital information over telephone subscriber lines. DSL Splitter allows both voice and data signals to travel over the telephone line. This device splits the combined signal to provide separate outputs for both phone and data. DSL Splitter filters out any erratic impedance from telephone equipment, which would interfere with DSL transmissions.

DSL Line Conditioner - AT102DSL

Single Line In-Line Filter - DSL (Digital Subscriber Line) Conditioner filters out any erratic impedance from telephone equipment, which would interfere with DSL transmissions.

Allen Tel introduces our new 110 terminating System for voice and data. The 110 System uses a simple modular approach with few basic components. Bases come in 300, 200, 100 and 50 pair densities. The 50 and 100 pair bases may be ordered with or without stand off legs. All bases come with label strip holders and paper label strips. The system can mount on the wall or a backboard. All components are UL listed.

CATV/COAX CONNECTORS

5 O-OHM BNC CONNECTORS

Allen Tel offers a broad line of Coaxial Connectors for Network, Video, Security and Computer Peripheral Interconnections. BNC Connectors allow ease of engagement and disengagement using bayonet couplings and overlapping dielectrics. All of Allen Tel BNC connectors, adapters and terminations come with gold plated contacts to insure the highest degree of performance, resulting in lower maintenance cost and customer satisfaction. Three connector installation methods are offered. First, the "O" crimp. This design allows a uniform compression on the cable braid enhancing the electrical performance. Second, the hex crimp which is the more traditional connecting method. Third is the twist-on connection. This design requires no special tooling to install on a cable.

CT 703 (MP) (5 pkg) Moisture Proof for STD RG-59

CT 732 (MP) (5 pkg) Moisture Proof for STD RG-6

F CONNECTOR ACCESSORIES

In-Line Splice

CT 721 (F-81NW) (2 pkg) Female 3/4" with nut and washer

In-Line Splice

CT 724 (F-71) (2 pkg) Double male splice

F-Terminator

CT 59T (5 pkg) 1 Watt 5%

A/B Switch

CT 502 (1 pkg) Slide switch for coaxial cable 2-75 ohm inputs and 1-75 ohm output. 60 DB isolation for selection of cable, TV antenna or VCR

TERMINATION TOOLS

Allen Tel Products Announces our **5-PAIR 110 TERMINATION TOOL**
Allen Tel's new 5-Pair 110 Termination Tool is designed to terminate and cut 2-3-4 and 5-Pair conductors on 110-type connecting blocks. The handle is ergonomically designed to reduce operator's fatigue. The cutting blades rotate in the head of the tool in order to terminate conductors without cutting. The ribbed rubber handle assures a slip free grip for the operator while maintaining a reliable impact.

ORDERING INFORMATION

AT110-5P	5 Pair 110 Termination Tool
AT110-5PRH	5 Pair Replacement Head
AT30 VT	Terminating Tool

AT30VT

VERSATAP TERMINATING TOOL

Designed to save time and fatigue on hands when terminating the Allen Tel Versatap Modular Voice and Data Jacks using the AT110 Impact Tool. Just snap the jack into position and it is ready to terminate. Upon completion slide the jack out. You have just saved valuable time and fatigue on your hands.

AT110

AT110 IMPACT TOOL

Terminations are quick and simple with the Allen Tel AT110 Terminating Tool. A simple push on the tool triggers the blade at just the right point to seat and cut the wire. It may be necessary to adjust the impact, since wire gauge and jacket thicknesses vary. Simply turn the end of the handle to adjust the force of impact. The AT110 comes with a standard 110 reversible blade. One end is designed to terminate and cut and the other to terminate only.

AT66

AT66 IMPACT TOOL

This "user friendly" tool quickly punches down unstripped wire in all devices using 66 clip terminals. A simple push triggers the mechanism to provide the exact seat and cut the wire. The blade is reversible to let you terminate and cut in one stroke or terminate without cutting.

ORDERING INFORMATION

AT66	Impact Tool for 66 Clip Termination
AT66-BLD	Replacement 66 Reversible Blade

ORDERING INFORMATION

AT110	Impact Tool for 110IDC (Connections)
AT110BLD	Replacement 110 Reversible Blade

NOTE: Blades are interchangeable with AT110 or AT66 handle.
